What does Normec Verifavia do?

Normec Verifavia supports organizations with independent verification, validation and audits in the areas of emissions, sustainability and compliance. The company helps organizations within the aviation, maritime and transport sectors to comply with international laws and regulations around emissions and sustainability.

What sectors does Normec Verifavia work for?

Normec Verifavia supports organizations within the aviation, shipping, logistics and transportation sectors, among others. In addition, the company helps organizations with sustainability issues around emission reduction, fuels and ESG verification.

With which regulations and programs does Normec Verifavia support?

Among other things, Normec Verifavia supports organizations with verification and compliance around EU ETS, UK ETS, CORSIA, FuelEU Maritime, IMO DCS, CII, SEEMP and SAF programs. In doing so, the company helps organizations demonstrate compliance with international emissions and sustainability regulations.

What is EU ETS for the maritime sector?

EU ETS is the European emissions trading system where shipping companies are required to monitor, report and offset their greenhouse gas emissions with emission allowances. These regulations apply to ships over 5,000 GT calling at European ports.

How does Normec Verifavia help with emissions reporting?

Normec Verifavia checks and verifies emission reports, monitoring plans and sustainability data. In doing so, specialists assess whether the data supplied comply with applicable international regulations and verification requirements.

Is Normec Verifavia accredited?

Yes, Normec Verifavia is accredited to international standards such as ISO 17029 and ISO 14065. It holds accreditations from COFRAC, UKAS and SAC, among others, for verification and validation services.

Why do organizations choose Normec Verifavia?

Organizations choose Normec Verifavia because of its combination of technical expertise, international experience and independent verification. With specialized teams within aviation, marine and sustainability, the company supports organizations with complex emissions and compliance issues worldwide.
